### **Webinar Description**

**Title:** Treatment of Repetitive and Restrictive Behaviors in Autism

#### **3.0 Type 2 BACB CEUs**

**Description:**

Treatment of repetitive and restricted behaviors (RRB) and interests is complex. This webinar provides an overview of RRB subtypes in autism; a review of research on treatment of RRB and offers a framework for selecting treatment recommendations based on supplemental assessment data.

**BACB 5<sup>th</sup> edition Task List**

- E-2 Behavior analysts' responsibility to clients
- E-3 Assessing Behavior
- F-3 Identify and prioritize socially significant behavior-change goals.
- F-6 Describe the common functions of problem behavior.
- F-9 Interpret functional assessment data.
- H-2 Identify potential interventions based on assessment results and the best available scientific evidence.

**Webinar Objectives and Learner Outcomes:** participants will be able to:

1. Identify the subgroups of repetitive and restricted behavior (RRB) in autism
2. Summarize the research on treatment of lower order RRB
3. Summarize the research on treatment of higher order RRB
4. Interpret assessment data for client's RRB
5. Identify potential interventions based on FBA tools specific to RRB
